

SUMMARY

- Software Engineer with 4 years of expertise in developing mobile and full stack web applications.
- Skilled in architecting software solutions, testing, and optimizing for performance with best practices.
- Experienced in utilizing AWS and Azure cloud infrastructure to deliver scalable and reliable applications.

EXPERIENCE

Software Engineer | FNR Solutions | Chicago, IL | July 2024 – Present

- Developed full stack web applications using React and Python, optimizing interfaces and backend data processing.
- Implemented AWS infrastructure and Terraform for automated deployments, ensuring scalability and consistency.
- Integrate Okta for SSO authentication, enhancing user management and security protocols.
- Collaborate on CI/CD pipelines using AWS CodePipeline, streamlining deployment and version control processes.

Software Engineer (Flutter) | Align Astrology | Chicago, IL | Jan 2024 – July 2024

- Developed Alignment feature which leverages Generative AI (GPT) for precise user compatibility prediction.
- Elevated user experience with intuitive UI guides, simplifying app navigation and enhancing rule comprehension.
- Redesigned horoscope visualization with customized insights, amplifying user engagement by 20%.
- Implemented and managed CI/CD pipelines using AWS CodePipeline improving deployment processes.

Software Developer | SkyIT – GBCS | Alberta, CA - Remote | Feb 2023 – Jan 2024

- Enhanced search and filtering systems and improved user experience for Android and iOS applications.
- Implemented an offline caching system with Room, reducing load times and data consumption by 30%.
- Optimized app interfacing for flexibility and performance resulting in 25% increase in user engagement.
- Conducted code reviews and Initiated code migration from Java to Kotlin and jetpack compose.
- Cross-collaborated with clients to gather requirements, define project scopes, and initiate projects.

Mobile Application Developer | Checago Coffee App | Chicago, US | Nov 2022 – May 2023

- Designed order alert system with push notifications for visibility of new orders with auditory alerts.
- Integrated Firebase messaging service (FCM) for push notification and upgraded target API.
- Streamlined order placement process by merging payment gateway processing phases.
- Configured MySQL Database and Cloud services including EC2, S3 and EBS to integrate data for API.

Java Developer | Eficens Systems | Dallas, US | April 2022 – Sep 2022

- Developed robust backend services using Spring Boot and Hibernate providing easily maintainable APIs.
- Documented codebase with UML Diagrams and collaborated with cross-functional teams.
- Integrated containerization and orchestration tools (Docker, Kubernetes) to improve deployment efficiency.
- Implemented integration and unit testing using JUnit, improving application reliability and code quality.

Junior Software Developer | Visudh Ajivam | Hyderabad, IN | Nov 2019 – Sep 2021

- Developed user interface for a Healthcare Application for native android OS to meet client requirements.
- Integrated Google Maps API into the application, enabling real-time location-based functionalities.
- Utilized SwipeRefreshLayout with ScrollView to integrate a Refresh feature with screen gestures.
- Implemented reusable UI components for Ads banners using ViewPager2, improving user engagement.

TECHNICAL SKILLS

Languages: Java, Kotlin, C++, C#, Dart, JavaScript, Yaml

Testing: JUnit, Espresso, Mockito

Version Control: GitHub, perforce

Engineering Concepts: Design Patterns, Agile and Scrum

Frameworks: Flutter, SwiftUI, NextJs, Express.js

Libraries: Provider, Bloc, React, UIKit, GetX

Backend: Spring, Express, Kafka, Kubernetes, GitHub Actions

Database: SQL, Amazon RDS, MongoDB, DynamoDB, Firebase

EDUCATION

MS in Computer Science | DePaul University, IL

BS in Computer Science | Osmania University, IN
